Regulatory Affairs Manager 281/525-2052 (phone)

281/525-2001 (fax) dgarner@idevmd.com

Date Prepared:

October 4, 2010

Trade Name:

SUPERA VERITAS[™] Interwoven Self-Expanding Nitinol Stent

Transhepatic Biliary System

Common Name:

Stent Delivery Catheter

Classification Name: Catheter, Biliary, Diagnostic; Class II

Product Code:

FGE

Predicate Devices:

SureSave[™] Interwoven Self-Expanding Biliary Nitinol Stent

System (K060557)

SUPERA® Interwoven Self-Expanding Nitinol Stent Transhepatic

Biliary System (K071646)

Bard E-Luminexx® Biliary Stent (K063532)

Device Description:

The SUPERA VERITAS[™] Interwoven Self-Expanding Nitinol Stent Transhepatic Biliary System is a 7Fr, 0.014" or 0.018" guidewire compatible, multi-lumen sheath based

KO93893 0920f3

delivery system comprised of a Handle and a SUPERA Biliary Stent. The stent delivery catheter includes a radiopaque Stent Length Marker Band and Distal Sheath Marker Band embedded in the Outer Sheath to aid in proper stent positioning; a Thumb Slide connected internally for advancing the Stent out of the Outer Sheath while the Outer Sheath moves proximally in a de-coupled fashion; a Sheath Flush Port for flushing the central lumen of the device; a Deployment Lock that when actuated enables the final deployment stroke of the stent; a Guidewire Lumen with a radiopaque Catheter Tip located on the distal end of the Catheter Shaft; a Guidewire Flush Port used for flushing the Guidewire Lumen; a Stent Driver which deploys the stent distally relative to the Outer Sheath; the System Lock which eliminates the possibility of premature deployment. The working length of the delivery catheter is 120cm.

The SUPERA® Stent housed within the SUPERA VERITAS¹™ stent delivery catheter is a closed end interwoven self-expanding Nitinol stent. The SUPERA® stent is composed of 6 interwoven, closed loop Nitinol wires. The wire loops are closed via a proprietary welding process which utilizes small Nitinol tubes that act as a coupler to provide the mechanical means of joining the wire ends. The table below includes the available sizes and model numbers for the SUPERA® stent.

120 cm Stent Delivery Catheter		Stent Length (mm)					
		40	60	80	100	120	
Stent Diameter (mm)	4	S-04-040-120-G3	S-04-060-120-G3	S-04-080-120-G3	S-04-100-120-G3	S-04-120-120-G3	
	5	S-05-040-120-G3	S-05-060-120-G3	S-05-080-120-G3	S-05-100-120-G3	S-05-120-120-G3

	8	S-08-040-120-G3	S-08-060-120-G3	S-08-080-120-G3	S-08-100-120-G3		

The SUPERA VERITAS[™] Interwoven Self-Expanding Nitinol Stent Transhepatic Biliary System is a sterile (via Ethylene Oxide sterilization) device and is intended for single use only.

Intended Use:

The SUPERA VERITAS[™] Interwoven Self-Expanding Nitinol Stent Transhepatic Biliary System is indicated for palliative treatment of biliary strictures produced by malignant neoplasms.

Comparison to Predicate Devices:

The SUPERA VERITAS [™] Interwoven Self-Expanding Nitinol Stent Transhepatic Biliary System is substantially equivalent to the predicate devices: IDEV's SureSave [™] Interwoven Self-Expanding Biliary Nitinol Stent System (K060557); IDEV's SUPERA® Interwoven Self-Expanding Nitinol Stent Transhepatic Biliary System (K071646); and the Bard E-Luminexx® Biliary Stent (K060557).

K093893

A review of the product specifications concluded that there are no major differences in design, materials, performance, safety and product effectiveness. Substantial Equivalence to the predicate devices has been demonstrated via bench and animal performance testing.

Performance Testing:

Engineering studies were performed per the FDA's "Guidance of Premarket notification 510(k) Submissions for Short Term and Long Term Intravascular Catheters"; the Guidance for the Content of Premarket Notifications for Metal Expandable Biliary Stents; ISO 10555 - Sterile, Single-use Intravascular Catheters; and ISO 10993 - International Standard for "Biological Evaluation of Medical Devices. Clinical data was not required in order to demonstrate safety and efficacy for the device modifications described in this 510(k). Bench and animal performance testing demonstrated that the SUPERA VERITAS™ Interwoven Self-Expanding Nitinol Stent Transhepatic Biliary System is substantially equivalent to its predicate devices. Additionally, the SUPERA VERITAS™ Interwoven Self-Expanding Nitinol Stent Transhepatic Biliary System appears to offer improvements in regards to the ease-of-use, ergonomics and manufacturability of the product. No additional safety risks were observed during testing.

Conclusion:

The SUPERA VERITAS[™] Interwoven Self-Expanding Nitinol Stent Transhepatic Biliary System demonstrated to be substantially equivalent to the predicate devices based on design specifications and characteristics, principle of operation, indications for use and performance testing.

Re: K093893

Trade/Device Name: SUPERA VERITAS[™] Interwoven Self-Expanding Nitinol Stent

Transhepatic Biliary System

Regulation Number: 21 CFR §876.5010

Regulation Name: Biliary catheter and accessories

Regulatory Class: II Product Code: FGE Dated: August 19, 2010 Received: August 20, 2010

Dear Ms. Garner:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act). You may, therefore, market the device, subject to the general controls provisions of the Act and the limitations described below. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration.

The Office of Device Evaluation has determined that there is a reasonable likelihood that this device will be used for an intended use not identified in the proposed labeling and that such use could cause harm. Therefore, in accordance with Section 513(i)(1)(E) of the Act, the following limitation must appear in the Warnings section of the device's labeling:

The safety and effectiveness of this device for use in the vascular system have not been established.

Furthermore, the indication for biliary use must be prominently displayed in all labeling, including pouch, box, and carton labels, instructions for use, and other promotional materials, in close proximity to the trade name, of a similar point size, and in bold print.

Please note that the above labeling limitations are required by Section 513(i)(1)(E) of the Act. Therefore, a new 510(k) is required before these limitations are modified in any way or removed from the device's labeling.

The FDA finding of substantial equivalence of your device to a legally marketed predicate device results in a classification for your device and permits your device to proceed to the market. This letter will allow you to begin marketing your device as described in your Section 510(k) premarket notification if the limitation statement described above is added to your labeling.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the <u>Federal Register</u>.

Please be advised that FDA's issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act's requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); good manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

If you desire specific information about the application of other labeling requirements to your device (21 CFR Part 801), please contact the Office of Compliance at (301) 796-5484. Also, please note the regulation entitled, "Misbranding by reference to premarket notification" (21 CFR Part 807.97). You may obtain other general information on your responsibilities under the Act from the Division of Small Manufacturers, International, and Consumer Assistance at its toll-free number (800) 638-2041 or (301) 796-5857 or at its Internet address http://www.fda.gov/cdrh/industry/support/index.html.

Sincerely yours,

Christy Foreman Acting Director
